A Happy New Year to One and All.

By W. H. PECK,

By W. H. PECK,
In presenting our "Prosperity Oil Edition" to the readers of The World
by are doing it with a keen sense and a certain knowledge that it is not
selected as the should have been and principally for the reason that the
book has devolved almost entirely upon Miss sofia Suppes, assistant oil
dine, because of the fact that either help that has been employed were
alled away to celebrate the season of festivity, which is only right and
reach, as Christmas and New Years comes but once a year.
On the other hand, it is with the greatest pleasure that the edition, sout
the first of January, at a time when everybody is strong in the belief
hat good times are here for the oil men, and what averybody believes is
found in a book entitled "The Ro-

Producing Production Per Well Barrels Barrels 598 212.203 167 199 152.900 183 ** *********************

combined amount to 2,342,750 bar-

"This is not an excessive amount, but to the contrary is rather a meager amount of kerosene, naphtha and thandline for a concern as large as the Standard Oil company of New Jersey, and its subsidiaries to have on hand any day. We find also that other large manufacturing concerns are forced to go into the gasoline in train-load lots to fill out their demand. Does this look like we are going into the dull season with such concraous stocks of gasoline on hand that it will tend to demorable the market? I should say quite the contrary, that it forecasts a tremendous domand for this product within the next 90 days.

To gasoline put up accordingly.

Stery concern engaged in the oil industry should begin to store gasoline not later than February, and a pull begin to store could oil with

The Damaging Effect of Spurious Promotions on the Oil Industry

By WILLIAM BERLIN GOOLSBY.

Associate Editor Oldom Magazine.

It may surprise the average oil man who is day by day literally immersed in oil to know that a majority of the people in the east actually doubt the existence, to any extent at least, of oil in paying quantities in either Oklahoma or Texas.

It is acidom a week passes but we are asked in all seriousness if there

doubt the existence, to any extent at least, of oil in paying quantities in either Oklahoma or Texas.

It is acidom a week passes but we are asked in all seriousness if there are "really any oil wells in Oklahoma or Texas." This question comes from people ranging all the way from elevator boys who have bought have not been people ranging all the way from elevator boys who have bought have not been the victim of unserupulous promoters who have it many instances also been the victim of unserupulous promoters who have traded them guit certificates for perfectly good American money.

Today the oil man who has a legitimate proposition finds himself handleapped in the financing of issues through the prejudice remaining from past performance, of the above-mentioned promater. The public unfortunately feels that some of the stigma which was attached to the promotions of the heyday period are still a part of the legitimate companies operating today. With the integrity and honesty of the majority of those who make up the oil business today. It is indeed unfortunate that this industry should not be looked upon by the public in general as being of the high standing which we in the business know it to be.

It is also unfortunate that the past four years have seen a greater majority of the people in the east buying securities than has ever been the case in any four years previously. It is possibly tase that a greater percentage of these promotions were based upon preprity which either existed dr was supposed to exist in Texas. But it is nevertheless frue that not only the Mid-Continent field, but any oil enterprise wherever it might be located, is still forced to bear the prejudice loft in the wake of tens of thousands of absolutely werthless stock issues.

The underlying feeling today in the minds of the average person in the cast who does not distinguish between the oil business and the oil game is that any oil stock is a gamble and it seems almost impossible to explain that there is a vast difference between the legitimate

is that any oil stock is a gamble and it seems almost impossible to explain that there is a vast difference between the legitimate company operating lis own proporties, which have been developed over a period of years, and the fly-by-night "Sinancier." who solls securities, the value of which is absolutely dependent upon the luck which may attend some drilling

d and hated by his people of long before the white man Once upon a time this warrior, so the Jajun story goes.

Led his part yforth to battle with the Seminoles, his ters.

Rode for many hours in allence till he glimpeed the Gray Then he signaled to his warriors for last

And invoke the war God's curses on the tribe we go to kill.' Be at length he gained the summit. flung his gaudy blankets Just in time to catch the lightning

in his copper-colored side.

None could say just how it happened. Nary cloud was in pened. Nary cloud was in the sky. And the whole caboodle heat it when they sa whier of chief

Nor the nerve to clim' of Gray
Mound up to where their
chief got hit.
Often I have seen the lightnin' when when the storms are rughn' high.

Smite that ol' mound's limestone boulders with its long tongues from the sky.

And I've seen the lone pine ewaying like a livin' thing in pain, Flinging wide its ragged branches in the gusts of wind and rain. I can see list how the legend of the old chief's tragte fall.

Holds its portant through the agesholds a meaning after all.

From his grows the fone pine sprouted and the spot from whence it grew
Is the target for the arrows of the 'God of Manitou.'

Casey got the job of spudding when
Gray Mound lease was filed.
And he staked the well's location,
timid as a child.
And we had to laugh at Cahey, who
had bravery to let.
For his superstitious notions
when the spuddin' stake was
set.

For the lone pine was in splinters and the stump was used to

UNDERREAMERS

There's a mound in Okiahoma, with a long pine on its crest.

Standing hise a same gray warrior—sharp against the golden west.

Like a least soof that mound is—like a clean-cut cames.

Lorming silver gray at sunriss—purple in the sumest glow.

Flat and treesless all ground it, in a streen unirokesn sea, of the flow'r-decked Cherokee.

Stretch the ago-old virgin prairies of the flow'r-decked Cherokee.

To the morth the land is cluttered. From wheels have marred the frails.

Snorting engines shunt the tak cars to the main line's gleaning ratia.

Everywhere are kindred noises, clank of fron and throb of deal. Everywhere are kindred noises, clark of iron and throb of drill.

Creaking shackle rods and cables weeking every vale and hill.

For the white mans hope is centered in his all-absorbing quest.

In his leases, ever nearing, to the Gray Mound's russed crest.

"And the infins say," said Casey, "That the sil Gray mound is henced by the ghoad of Mail-Che-Tan, Ons-time big Commanche shieffain, value at heart and strong of the Smackover, heard about the supplementation of the Tex-O-Kan, Ons-time big Commanche shieffain, advanced 20 cents per barrel by the sheart and strong of mews of Mexia crude having been advanced 20 cents per barrel by the sheart and strong of Mexia crude having been advanced 20 cents per barrel by the sheart and strong of Mexia crude having been advanced 20 cents per barrel by the sheart and strong of Mexia crude having been advanced 20 cents per barrel by the sheart and strong of Mexia crude having been advanced 20 cents per barrel by the sheart and those of the biggest companies with the heart and strong of the Pralice office, the news of Mexia crude having been known for the biggest companies advanced 20 cents per barrel by the sheart and those of the biggest companies with the indication of the biggest companies advanced 20 cents per barrel by the sheart and those of the biggest companies with the field has been known for the biggest companies advanced 20 cents per barrel by the sheart and the biggest companies advanced 20 cents per barrel by the sheart and the biggest companies advanced 20 cents per barrel by the sold in the biggest companies advanced 20 cents per barrel by the sheart and the biggest companies advanced 20 cents per barrel by the sold in the biggest companies advanced 20 cents per barrel by the sold in the biggest companies advanced 10 cents and 1 into the biggest companies advanced to companies advanced to cents.
